

A MESSAGE FROM MS. SCHULLAR ROBINSON- CEO/FOUNDER

Sometimes it becomes very challenging when dealing with today's youth- please know that there is help. Know that today's youth is our future, so why not secure it? As a society, we owe it to our youth to provide guidance and leadership in an effort to ensure a positive future. Even though change may not happen overnight, it can happen over time.

Let us stick together and build a strong foundation that will overcome all the negativity that may try to interfere with the progression of the positivity of our society. Together we can reshape young minds that have been polluted with gang mentalities and "get rich quick" schemes to positive productive individuals that are willing to utilize their minds for power, their hearts for courage to avoid negative peer pressure, and the willpower to want to succeed.

Securing our future is our human responsibility; making a moral investment to bring about a change that can be felt for decades to come. It is a safety plan to ensure that our society will prosper with drive and commitment to our youth...**FOR THEY ARE OUR FUTURE.**
